

Customise your home

Your park home does not have to lose any of its previous character when you install Snug Park Homes Insulation. The system comes with a range of optional architectural features to enable you to customise your home. Indeed you may wish to take the opportunity to improve its appearance.

Brick Slips

Using special lightweight Insta brick slips, we can create a brick-line facade to complement your render.

Quoins

Insta decorative quoins simulating either stone or brick can be applied to corners on request. These can significantly improve the finished appearance.

Fascia Boards and Guttering

High quality PVC InstaFascia boards and guttering can be supplied and installed as part of the insulation process, if required.

Shutters

A range of decorative shutters are available. Ask our surveyor to explain the options for your home.

Our surveyor will be happy to advise you on the most appropriate finish for your home.

Guarantee

We are pleased to offer a ten year guarantee on materials and workmanship for our range of Snug Park Homes insulation products.

Please ask our surveyor for more details.

THE
COST SAVING
ENERGY EFFICIENCY
SOLUTION
FOR PARK HOMES

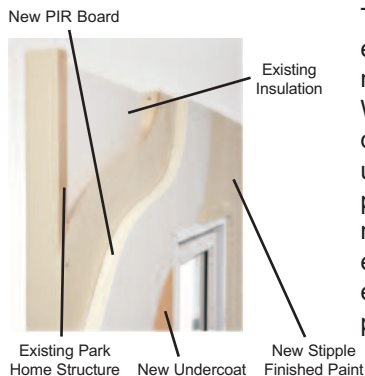

Introducing Snug Park Homes

The Snug Park Homes Insulation System

The Snug Park Homes insulation system is an exciting new development from InstaGroup, one of the UK's largest and most highly regarded insulation companies. It provides outstanding thermal protection for park homes, keeping you warm in Winter and cool in Summer.

Snug Park Homes insulation is a slim, layered insulation system which is fitted to the outside of your home. Not only does it provide excellent insulation, it can also improve the appearance and durability of your home.

The key element is an effective insulation material known as PIR. We have now developed a way of using the thermal properties of this unique material to provide an excellent energy efficiency solution for park homes.

Loft Insulation

Of course, insulating the walls is not enough on its own! Up to 25% of the heat in your home can escape through the roof.

To ensure your Snug Park Homes wall insulation system operates to its highest possible effectiveness, we will also insulate your loft with one of our range of high performance loft insulation products.

Floor Insulation

We can offer effective insulation of your floor to further improve the energy efficiency of your park home with our range of high performance floor insulation products.

Potential Health Benefits

Our specially designed insulation membrane together with the reduction in fuel consumption achieved, should create a healthier environment for park home dwellers.

Reducing Your Carbon Footprint

Home insulation is recognised as one of the most cost-effective ways to reduce household carbon emissions which contribute to Global Warming. Insulation brings benefits for us today as well as for future generations tomorrow. So we can all do our bit for the environment while reaping the rewards of improved comfort and lower bills.

The Benefits for You

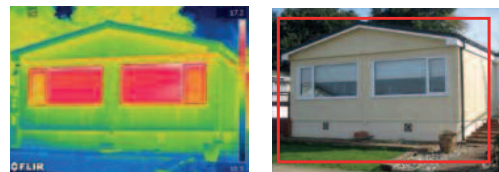

- Significantly reduce your fuel costs
- Improve weather resistance
- Stay warmer in Winter and cooler in Summer
- Increase the value of your property
- Improve the appearance of your home
- Reduce your carbon footprint

Before (pre-improvement)

A typical park home may require constant heating to maintain a comfortable temperature.

and After (post-improvement)

After treatment with InstaTherm the park home will retain its original character and retain the heat for longer. This will make it less expensive to heat.

What our customers say...

Mr & Mrs Wheeler (right) recently had Snug Park Homes insulation installed at their park home in Berkshire.

"We are delighted with our Snug Park Homes insulation and we were really impressed with the team which carried out the work.

"They worked very efficiently and with great attention to detail. Nothing was too much trouble for them.

"Our home looks wonderful and I can already tell the difference it is making to the temperature inside.

"This is one of the best things we have ever done. The money we save on our heating bills will help to pay for our holiday in Cyprus!"

We can arrange for a specialist technician to undertake a FREE, no-obligation survey.

Grants

As part of their drive to reduce carbon emissions, some local authorities now offer grants towards the cost of insulating park homes. We recommend that you enquire with your local council about schemes available to help fund the work.
