

Ezy-Install[®]

MAGNETIC FLOORING SOLUTION

InstaFloor high performance magnetic flooring solution made from recycled rubber granules recovered from vehicle tyres.

The unique acoustic roll down installation system with dual bond fixing strength

Ezy-Install is a unique flooring solution that incorporates dry tack adhesion with magnetic technology. Working in partnership with IOBAC, InstaFloor have created a roll down acoustic underlay with superior sheer and peel strength over standard magnetic systems.

IOBAC resin is factory applied to create a dry laid, clean and fast installation process, incorporating acoustic insulation

Dual Grip Flooring Technology

- Dual grip provides maximum durability
- Compatible with a wide range of floor coverings
- Dry laid system that can be installed over a new or existing floor
- Provides a high performance vapour barrier for moisture mitigation
- New floors can be walked on immediately
- Provides excellent impact sound reduction
- Hygienic, naturally anti-microbial and anti-allergy
- Environmentally friendly and recyclable
- Ongoing tax benefits due to the floor finish being classed as removable
- Easy floor maintenance as worn or damaged tiles can be quickly replaced, avoiding costly retail down time
- Clean removal of floor coverings ready for recycling, while the Ezy-Install underlay stays in place ready for the new floor covering

Suitable For Wide Range of Floor Coverings

- Luxury Vinyl Tiles
- Engineered Wood
- Carpet Tiles
- Looselay Vinyl Tiles
- Ceramic/Porcelain Tiles

Ezy-Install Roll Sizes:
2.5mm - 1m x 5m (17dB Delta Lw)
3mm - 1m x 5m (23dB Delta Lw)

Environmentally Friendly

Step 1
Lay Ezy-Install on sound sub floor with minimal preparation or over existing floor covering

Step 2
Install magnetic backed floor covering OR use MagTabs to install standard 4mm vinyl tiles or carpet tiles

MagTabs

Magnetic on one side and self-adhesive on the other, MagTabs work by locking tiles tightly together to create the next generation in "floating floor" technology.

MagTabs affix to the Ezy-Install roll down system or any magnetically receptive sub floor such as raised access panels. Carpet tiles and 4mm minimum thickness vinyl tiles are simply fixed in place, gripping strongly to each other in both horizontal and vertical directions.

Please see MagTab installation instructions for more information (www.ezyinstall.com)

Applications

Retail Spaces:

- Flexible, adaptable flooring solution
- Change display areas quickly to maximise customer experience
- Easy maintenance with minimal retail down time
- Rotate high traffic areas to extend floor covering life

Hospitality and Leisure:

- Freedom of design to create spaces with swappable floor finishes
- Minimises down time when new floors are installed
- Fast, cost effective repairs, minimising disruption to customers
- Acoustic insulation reducing impact sound

Work Spaces:

- Removable floor giving easy access to service voids
- Flexibility to provide branding alignment
- Change floors without major disruption
- Avoids damage to access floors with plywood decking and adhesives

Residential / Student Accommodation:

- Acoustic insulation creating quieter living spaces
- Provides vapour barrier avoiding costly moisture control processes
- Delivers fast installation process, saving program time and cost
- Clean and fast defects procedures

**Lower Life
Cycle Costs**
