InstaGen Inverter Configuration Guide Manual

STEP 1
Check & Operation

Check List:

- Inverter ground wiring
- Communication module insertion
- COM2 connector insertion

START

Operation order:

1. AC insurance (if any)
2. AC circuit breaker
3. Inverter PV DC switch

If everything is ready, then please download *InstaGen* APP.

Official Website

STEP 2
Device Direct Connection

Device direct connection >

Way 1:
Connect to the inverter's WiFi

Way 2:
Connect via LAN

- 1. Search the inverter Wi-Fi on your phone;
  - ✓ Name as WIFI-APXXXXXX, The last few digits of the Wi-Fi name are the same as the inverter SN.
  - ✓ Please keep the Duocom connected before the operation.
- Connect it and back to InstaGen APP
- Login by installer role (Default password: 123456)

- Connect all the devices to the same local area network by wire or wireless
- Back to InstaGen APP and login by installer role (Default password: 123456)
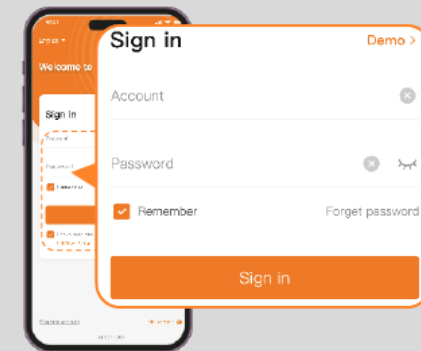

## STEP 3
Quick Configuration & WiFi

Quick configuration

WiFi
