InstaGen.

The Complete Solar Solution.

InstaGen isn't just solar panels

It's an intelligent energy system that works for you, making it easy to generate, store, and manage your energy.

Our battery storage solution enables our customers to store off-peak energy and save money.

Our UK-based technical teams are here to support your journey every step of the way, from energy assessment to post-install support. Our experts monitor all installed systems and provide technical support within 24 hours.

Built by InstaGroup, trusted leaders in renewable energy for over 45 years.

InstaGen

The InstaGen System

- **Solar PV panels:**
High-performance, sleek, and durable.
- **Advanced inverter technology:**
Converts solar power efficiently for home use.
- **Battery storage system:**
Keep unused power for when you need it.
- **Smart monitoring app:**
Track energy generation and usage in real-time.

With InstaGen from InstaGroup, everything is designed to work together, ensuring maximum efficiency and savings.

Smart Energy at your fingertips

The InstaGen app lets you track your solar savings in real-time. You can also monitor energy production, check battery storage levels, and optimise usage—all from your phone.

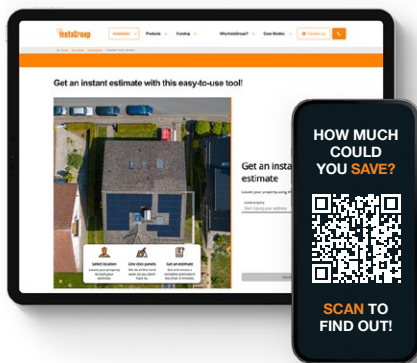

The benefits of solar with InstaGen. **Why install solar?**

Energy bills are unpredictable, but your savings don't have to be. Solar power puts you in control, reducing energy costs and your reliance on the grid. Even on cloudy days, InstaGen ensures your home stays powered efficiently.

We'll calculate exactly how much energy your home could generate and project your estimated savings. Plus, with rising energy prices, your return on investment keeps getting better.

Find out how much you could save by using our calculator online. Simply scan the QR code (below).

With our in-depth solar survey, we'll provide a clear payback period, showing how long it takes before your system has paid for itself through energy savings. Most homeowners see a return in just a few years.

How much can you save?

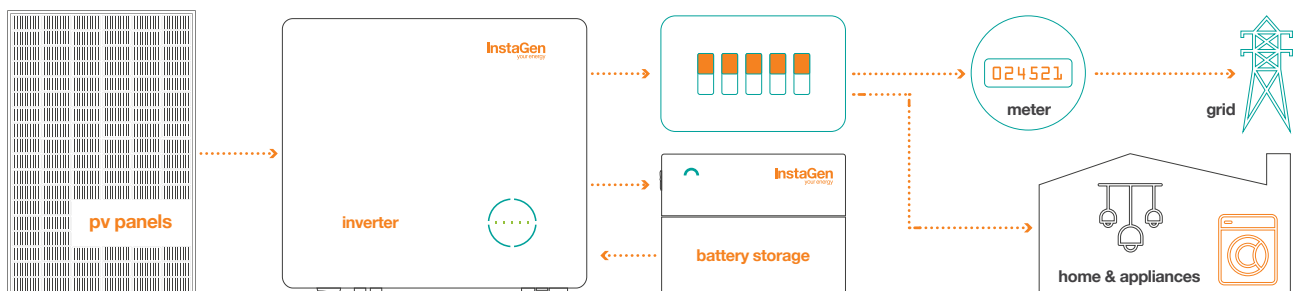

Here is a typical solar installation to illustrate the savings you can make.

- **House stats:** 4-bed house with a south-west roof
- **Solar installed:** 7 solar panels
- **Cost of installation:** £6.8K investment
- **Clean energy generated:** 2,736 kWh
- **Expected payback:** 9 years

The app has been set up for a 'time-of-use' charging programme, which fits with their current electricity tariff and will help them make the most of the system.

Control your home energy costs

Easy energy management

A solar install pays for itself

Usually no planning permission required

Works on cloudy days

Enjoy the benefits of home energy storage.

InstaGen battery storage can set you free from the big energy companies and the way they price up electricity. You can even keep the lights on if there's a power cut.

Your cheaper, stored energy also actively supports a cleaner energy future, as it reduces reliance on ageing and inefficient power stations, helping to lower the UK's CO2 emissions.

Save ££s on laundry

Keep the lights on if there's a blackout

Charge an EV

Support cleaner energy use in the home

Did you know?

The National Grid offers payment if you don't use electricity at peak times. If you've got battery storage you can benefit from the payment – while using your own stored electricity supply.

Why choose InstaGen from InstaGroup?

45 years of expertise

InstaGen from InstaGroup delivers complete, all-in-one solar solutions—supplying, installing, and supporting your system from day one. No third parties, no mismatched components—just seamless performance and peace of mind.

– Proven Expertise:

Decades of experience creating more efficient home solutions.

– Dedicated Service:

Hands-on guidance, from system design to technical support.

– British Quality-Controlled Solar & Energy Storage:

Reliable and rigorously tested for long-term performance. Solar panels have a 25 year minimum performance guarantee.

– UK-Based Technical Support:

Expert help before, during, and after installation.

– Market-Leading Warranties:

Includes a 10-year product guarantee and ongoing aftercare support.

How is InstaGen installed?

We make solar installation quick and hassle-free

Our expert team completes most installations within 1-2 days with minimal disruption.

1 Pre-installation Survey & Structural Assessment

Engineer conducts roof/electrical survey, provides MCS report for tailored design.

2 DNO approval

DNO approval: G99 pre-installation (up to 45 working days) and G98 post-installation.

3 Scaffolding Erected

Scaffolding installed pre-work for safe access.

4 Panel, Inverter, Battery Installation, and commissioning

Install panels, test system, set up monitoring.

5 Handover

Receive complete paperwork for your records.

6 Peace of mind

UK team monitors daily, supports promptly and reliably.

Rigorous quality control and investment in the latest solar technology ensures an InstaGen system will perform far into the future.

10 years

Enhanced product guarantee on batteries and inverters

25 years

Linear power output warranty on panels

Your questions **answered.**

Can I stay in my home during the install?

Yes, our team works efficiently with minimal disruption.

Do I need planning permission?

In most cases, no.

Will solar panels still work on cloudy days?

Yes, InstaGen from InstaGroup is designed to generate energy, even in lower light conditions.

How do I monitor my system?

The InstaGen app provides real-time insights into your energy use and savings.

Is there ongoing maintenance?

InstaGen requires little maintenance—just occasional cleaning and a yearly check-up.

What happens if I sell my home?

An InstaGen solar system can add value to your property and be a strong selling point for energy-conscious buyers.
